

Capital HHH Run 2029 –Hidden Spew- Calwell Chunder Run

The Circle was small but warm, with the fire bucket roaring, the Fire Brigade (sorry Harriettes, you should have been there!) turned up for the first time in a long time. After informing us that the using for heat excuse no longer works (I copped a down down on behalf of JR for not telling us of the rule change!), however after asking us a few times if we were cooking (of course we were!!!!) we were let off as you can use the fire for cooking, a reminder to committee to have a grill plate near the bucket for future runs. The very Dysentery affected Hare copped a fake down down, as he couldn't keep anything down.

This time no waiting for Box and off we went with the run report:

Box commented that we went up, down and saw the bad bits of Calwell, but gave it a 10, no Cock and Burn tonight to veto! The run report gave it a 5.
