

Capital Hash House Harriers – Run 2081 - JR – Mt Arawang Base Camp - Chapman Run

Another 8 Km climbing epic was put on for the Hash to enjoy. Not only did we get to enjoy the heights of Cooleman Ridge, but also the steps to the Cooleman Trig Station. I was disappointed when I got to the top of the Cooleman Trig Station to find the hammock engaged and I sorely needed it to recover! The views from many points of the run were fantastic and I've actually enjoyed getting out to the hills for a walk again, it's been a while since Hash has embraced hill runs!

The GN had some announcements after the Committee meeting last week:

- The current running arrangements would continue until at least the end of July
- A socially distant gathering would be held at the end of the run for those that start at 2pm Sun
- The run fee will rise to \$5 from next week, this is the only income coming in and we need to engrave mugs, rego trailer etc
- The GM will aim for a restaurant run at the end of June, more details to come
